MOBIMEDIA SOLUTION

Dear shareholders, 14.08.2018

We at the MMS management would like to inform you of the latest events in the company and keep you up to speed with the plans and activities for the immediate future.

During the first two quarters of 2018, the company has continued the efforts from 2017 regards to settle open matters, unclarities, debts and loans, as well as consolidating the new business plan and structure.

The Swedish company Lofar AB, currently the main shareholder in MMS, has in close conjunction with the MMS leadership carried out the plan as decided early this year and communicated to the shareholders in May. This effectively means capital injections, via its partner Denlux S.A.R.L, at the end of August, and a launch of MSS' new business during the autumn of 2018.

Also, an acquisition of a POS company, to further strengthen the company's market proposition, will be fulfilled shortly. This will be an essential component for the market launch during the autumn, as it represents an already rolling business with cashflow, customers and cutting-edge digitalized solutions. The synergies with MMS' core business set-up, are significant.

MMS will, as previously communicated, focus on:
- engineering and designing its own payment platform, with the ability to perform a global launch with applications tailor-made for each region/country
- B2B and through licences, with clients who have their own clients and end-customers
- clients that consider our choice to be more cost-efficient and a safer, smoother solution than the one(s) their existing partners provide
- "Point of Sale" relevant customers (restaurants, retail, hotels and equivalent).

As MMS is approaching this enterprise with a lean organizational structure, i.e. minimal overhead costs and equivalent, being able to move and work with a high degree of built-in agility, combined with state-of-the-art technological and commercial products and services, we strongly believe that the company will be able to swiftly establish a good position in the market place.

We believe that the outlook for the company is indeed very good. It is obviously highly important that the management continues to work rigorously with the areas, tasks and objectives that follow from the business plan as briefly outlined above.
We will keep you continuously informed about the progress.

Best regards

MMS Management by
Jan Vidar Hugsted
