Consulting

What we do at Berg Holding.

O1

Preparation for the **debut of the Issuer on the main market of the Warsaw Stock Exchange (GPW)**

O2

Elaboration of a project to build a **factory for the production of heat pumps** in Poland; this preparation shall be elaborated together with NETSU S.A.

O3

Construction of 5 – 15 photovoltaic farms

O4

Elaboration of a project to **build a plant for recycling photovoltaic modules and heat pumps**

O5

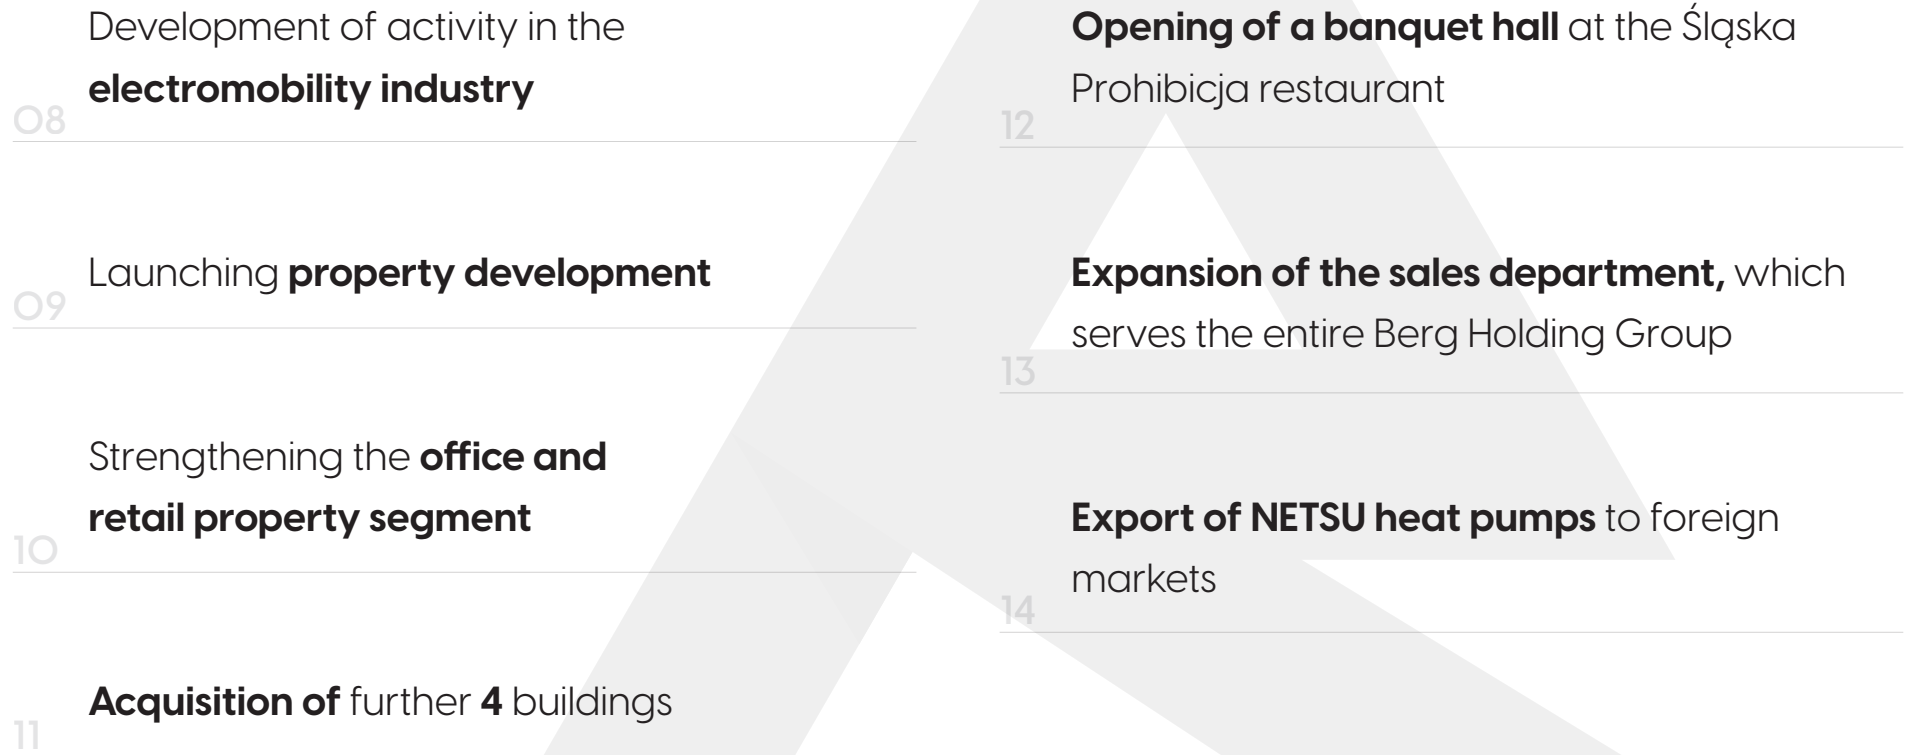

Debut of the companies **Farmy Fotowoltaiki S.A. and NETSU S.A. on the NewConnect market**

O6

Expansion of business activities in the Renewable Energy (OZE) sector, which should include ENERGY STORAGE, BIOGAS PLANTS, WINDMILLS

O7

Transformation of the merlin.pl online shop into a European marketplace

ECO-REVOLUTION.

The activities of Berg Holding in the Renewable Energy (OZE) sector covered by this strategy are consistent with the current EU climate policy framework for 2021 – 2030. We plan to be an active beneficiary of programmes that are available in green path development of our society.

the National Recovery Plan aiming at strengthening the economy in the area of the environment among others, by implementing a green energy programme and thanks to a reduction in energy consumption and enhancing green and smart mobility – **158 billion PLN** in subsidies and loans until 2026,

“Clean Air” Programme launched in order to improve the air quality and aiming to reduce greenhouse gas emissions (GHG) by replacing heat sources and improving the energy efficiency of residential buildings – whose budget amounts to **PLN 103 billion** in subsidies until 2029.
